By D W Lewin

Not Avail, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 Excerpt: .of Eucalyptus oil can be produced from 1.0001b. of Stringy Bark (Euc. Obliqua) leaves. The bark of this tree will also make paper. The wood of the Peppermint (Euc. Amygalina) yields carbonate of potash, acetate of soda, and acetic acid. The ashes yield at least 10 per cent, of pearlash, the inner bark pulps well, and is suitable for making coarse papers. The gum is medicinal, and the leaves yield more oil than any other of the Eucalypts, viz., oOoz. per 1,0001b. of leaves, or 3.113 per cent. There are many other trees of the Tasmanian forests besides gum trees that yield useiul products. Leatherwood (Eriostemon squamens), the glutinous covering of the young shoots, is used bv bushmen to apply to cuts and wounds, on which it is said to have a wonderfully healing effect. The bark of the Sassafras is used in the preparation...
