## Bulletin Volume 499

By University Of Wisconsin

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 34 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 Excerpt: . . . identical with that of the other engineering courses. The mathematics, physics, mechanical drawing, and mechanics are the same as required for other engineers. In surveying, a preliminary freshman course is followed by a six weeks field course in the Summer School and in the junior year by courses in railway location and mine surveying. General chemistry, qualitative and quantitative analysis, and assaying are taken in the freshman and sophomore years. Special class and laboratory courses in hydraulics and structural, electrical, steam and gas engineering cover the general subjects. Mineralogy is started in the sophomore year, followed by general geology in the junior, and economic geology and petrology in the senior year. The preparatory courses in mining in the junior year cover the subjects of excavation, explosives, quarrying, tunneling, boring, and shaft sinking. In the senior year, courses on prospecting, development and exploitation of mines are given...

### Reviews

*Complete guideline! Its this type of great read through. it absolutely was writtern quite perfectly and helpful. I am very happy to explain how this is basically the best book i actually have read through during my personal life and can be he very best book for at any time.*

-- **Joshua Gerhold PhD**

*A very awesome book with perfect and lucid reasons. It really is basic but shocks within the 50 percent of the book. Its been designed in an exceptionally easy way and is particularly merely right after i finished reading this ebook where in fact changed me, change the way i think.*

-- **Meagan Roob**
