The dust process involves a more expensive installation than zinc shavings, but has the advantage of greater compactness and cleanliness, and involves less labor in maintenance and cleaning up as well as less risk of theft. The periodical cleanup is absolute, while a holdover of several thousand dollars worth of precious metal commonly occurs with zinc shavings, and makes it impossible to compare the actual with what is often called the theoretical recovery. After a destructive fire, precipitate in a filter-press has been found intact, while zinc boxes have entailed great difficulty in the attempts to recover their contents. At a gold plant a press occupying a floor space of 5 ft. by 14 ft. can easily carry a month's accumulation of \$40,000. The comparative cost of...
